

SPRINTURF UltraBlade DFE EXTREME

Sprinturf has the most dual fiber fields in the nation. DFE Extreme fields feature a 330 micron plus monofilament and a 120 micron plus slit film. Exclusively made in house and in Amercia.

The combination of monofilament and parallel-fibrillated fibers interlock to nearly eliminate infill flyout – a common complaint amongst athletes, coaches, and parents. The available two color configuration provides stunning aesthetics.

Sprinturf DFE Extreme fields feature two unique polymer technologies. State of the art C8 monofilament resins from Dow and Nova are married to a proprietary metallacene slit film resin from Exxon. The combined product featuring the greatest polymer suppliers in the world provide unmatched durability with exceptional resilience, playability, and safety.

UltraBlade DFE Extreme availibe with or without thatch zone

Fiber	Fibrillated Parallel Long-Slit / Monofilament
Fiber Supplier	ITS - Sprinturf
Fiber Denier	10,000 / 10,800
Fiber Thickness	120 Microns / 330 Microns
Pile Height	2" - 2.5"
Face Weight	52 oz / yd2
Primary Backing	Triple Backing
Primary Backing Weight	9 oz / yd2
Primary Backing	Woven/Non-Woven/Woven
Secondary Backing	Polyurethane
Secondary Backing Weight	24 oz / yd2
Total Weight (w/o infill)	85 oz / yd2
Tufting Gauge	3/8"
Tuft Bind	>10 lbs/force
Permeability	>60 inches/hour
Infill Options	100% Rubber (Shown) Other options available
G Max Warranty	All Rubber: < 150G's Sand/Rubber: < 175G's

The information provided above represents the standard characteristics for the named product. If required this product can be manufactured to meet alternative specification requirements within our manufacturing tolerances. The above referenced data and supporting reports apply only to the sample tested and are not necessarily indicative of the qualities of apparently identical or similar products.

SPRINTURF®

History

- Sprinturf in business since 1998
- Zero Fiber Failures
- Most fields in the U.S.A. older than 10 years
- Most dual-fiber fields in the U.S.A.
- Most 100% rubber infill fields in the U.S.A.

Technology

- C8 monofilament resins from Dow and Nova are married to a proprietary metallocene slit film resin from Exxon
- Available with Cool Fiber
- Introducing new Shark-Tooth fibrillation
- Introducing new patent-pending, no-perforation urethane coating with 2x drainage

Durability

- 100K cycles on the Lisport
- 120 micron slit / 330 micron monofilament fibers for maximum durability
- Most dual-fiber fields in ground since 2007

Risk Mitigation

- The only North American turf company with 100% of fibers made in-house and in the U.S.A. (Fiber failure is the primary cause of field failures)
- The only North American turf company with vertically integrated fiber manufacturing, tufting, coating and installation
- The only turf company that is 100% American owned, 100% invested in America and has a 100% American workforce

Lisport Testing

- No splitting or cracking
- Excellent resiliency

Manufacturing

- State-of-the-art Starlinger, Reimotec and Barmag extruders
- High-speed tufting machines
- Dedicated urethane coater
- Texturized thatch capability
