

REPLAY

SYNTHETIC TURF SYSTEM

FEATURING OUR FIELD-TO-FIELD™ PROTOCOL

THE NATURAL CHOICE FOR FIELD REPLACEMENT

Sprinturf® has teamed up with Greenplay® to offer the industry leading REPLAY™ turf system. REPLAY exemplifies the Field-2-Field™ protocol that Sprinturf has committed to, by re-purposing the sand/rubber infill from your old sports field and using it only as ballast under a fresh layer of Greenplay Organic Infill to provide a natural, grass like playing surface. Some of the many benefits of our Field-2-Field design proposal with Greenplay:

- Low sports field temperatures
- Grass-like foot stability and overall performance
- · Natural fiber matrix infill stability and minimal fly-out
- A natural grass look and feel with low maintenance
- Low surface abrasion minimizing scrapes and burns
- The durability of Sprinturf's proven turf technology
- Reduces environmental burden of waste transport and landfill waste

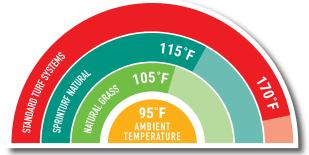

90 DAY RISK FREE GUARANTEE*

*If you are dissatisfied with the infill for any reason, notify Sprinturf within 90 days and we will replace the GreenPlay infill, with a standard sand/rubber blend, at no cost.
