PREDATOR SN

SPRINTURF
A PLAYCORE Company

FAST BY DESIGN. RELENTLESS BY NATURE

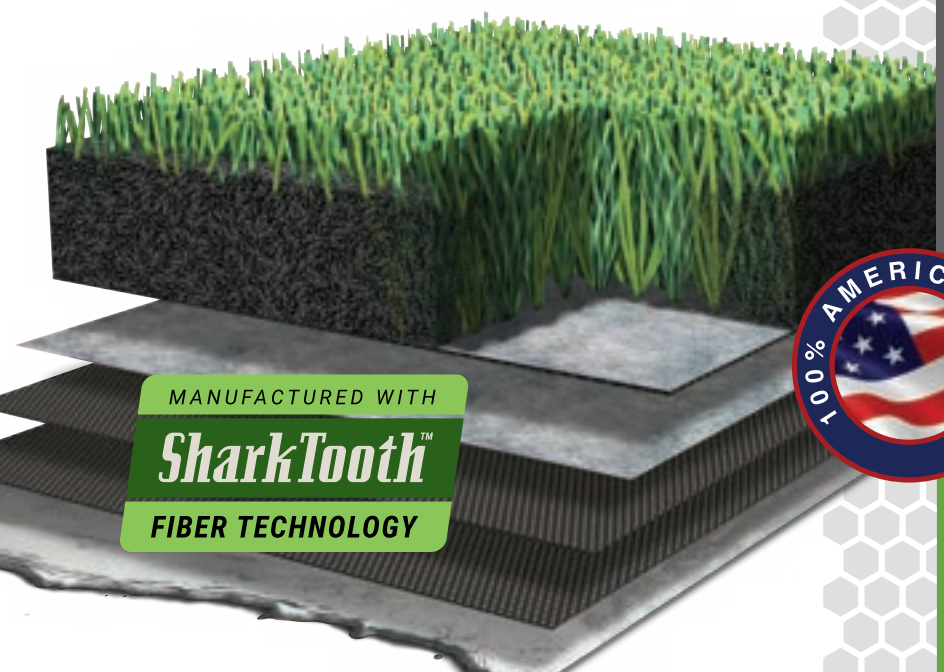
APEX™ & SHARKTOOTH™ FIBERS

Predator Single Needle is a dual-fiber turf system that brings the rugged performance of the Sprinturf Predator platform into a refined single-needle construction. By combining precision-cut SharkTooth slit-film fibers and Apex monofilament fibers within the same tuft, Predator SN provides Predator-level durability with a softer feel, exceptional resilience, and improved ball roll.

The single-needle construction creates a smoother, more integrated surface profile with a blended color appearance. Predator SN uses a specialized resin formulation selected to create a softer feel with Predator-level durability. That balance gives the system its strongest performance advantage: the resilience to support repeated play, the feel athletes notice underfoot, and an improved ball roll.

Sprinturf manufactures Predator SN in-house in the USA under strict ISO 9001-certified quality processes. Available at 50 ounces and above and backed by a 10-year warranty, the system gives Sprinturf customers peace of mind in long-term performance, project reliability, and accountability from pellet to play.

When investing in an athletic field built to perform for years, Predator SN offers a refined evolution of Predator with the confidence that comes from working with a trusted partner.



SPECIFICATIONS

FIBER SPECIFICATIONS	
Fiber A	**SharkTooth™ Slit-Film**
Denier	5,500
Thickness	140 microns
Color	Field Green
Fiber B	**Apex™ Monofilament**
Denier	8,000
Thickness	380 microns
Color	Lime Green
SYSTEM SPECIFICATIONS	
Pile Height	1.75" – 2.25"
Face Weight	50 oz/yd2
Primary Backing	Non-Woven/Woven/Woven
Primary Backing Weight	8 oz/yd2
Secondary Backing	Polyurethane
Secondary Backing Weight	24 oz/yd2
Total Weight (w/o infill)	82 oz/yd2
Tufting Gauge	1/2"
Tuft Bind	>10 lbs force
Permeability	>40 inches/hour
Infill Options	Per Specifications
G Max Warranty	Per Specifications

The information provided above represents the standard characteristics for the named product. If required this product can be manufactured to meet alternative specification requirements within our manufacturing tolerances. The above referenced data and supporting reports apply only to the sample tested and are not necessarily indicative of the qualities of apparently identical or similar products.

WHY SPRINTURF

MANUFACTURING FACILITY ISO 9001

HISTORY

- In business since 1998
- Zero Fiber Failures
- Most fields in ground greater than 10 years old*
- Most dual-fiber fields in the U.S.A.
- Most 100% rubber infill fields in the U.S.A.

TECHNOLOGY

- C8 monofilament resins from Dow and Nova are married to a proprietary metallocene slit film resin from Exxon
- Introducing new SharkTooth fibrillation

DURABILITY

- 200K cycles on the Lisport
- 140 micron slit / 380 micron monofilament fibers for maximum durability
- Most dual-fiber fields in ground since 2007

RISK MITIGATION

- The only North American turf company with 100% of fibers made in-house and in the U.S.A. (Fiber failure is the primary cause of field failures)
- The only North American turf company with vertically integrated fiber manufacturing, tufting, coating and installation
- The only turf company that is 100% American owned, 100% invested in America and has a 100% American workforce

LISPORT TESTING

- No splitting or cracking
- Excellent resiliency

MANUFACTURING

- State-of-the-art STC Spinnzwirn extruders
- High-speed, dual-feed tufting machines
- Dedicated urethane coater
- Texturized thatch capability
