WHERE GRIT FINDS PURPOSE

ULTRABLADE®

EXTREME

100% AMERICAN MADE

UltraBlade Extreme is Sprinturf's proven all-slit-film system for long-term field durability. Pioneered in 1998, UltraBlade technology is featured in more fields over 10 years old than any other synthetic turf fiber system in the nation, with 3,500 successful installations and zero fiber failures.

The fiber is the difference. UltraBlade Extreme uses two field green, 120-micron parallel long-slit fibrillated fiber profiles, built around Sprinturf proprietary Exxon metallocene resin technology. This is not generic slit-film turf. It is a proprietary fiber system manufactured in-house in the USA for exceptional strength, wear resistance, and long-term performance.

The proof is measurable. UltraBlade Extreme's tensile strengths average 40 percent higher than industry standard, and the system routinely exceeds 100,000 cycles in Lisport accelerated wear testing. That gives UltraBlade Extreme a durability story backed by field history, material science, and documented testing.

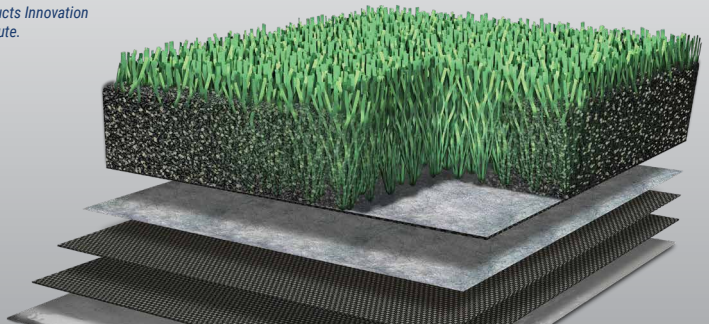

Sprinturf strengthens the product with accountability from pellet to play. Manufactured in the USA, UltraBlade Extreme is backed by Sprinturf's ISO 9001-certified facility and a 99.7% on-time delivery rate. For a field project with schedules, seasons, and opening dates to protect, that record matters.

CRADLE TO CRADLE CERTIFIED®

full scope
CERTIFIED
cradle to cradle
bronze version 5.0

Cradle to Cradle Certified® is a registered trademark of the Cradle to Cradle Products Innovation Institute.

Beyond proven field performance, UltraBlade Extreme is C2C Certified® Full Scope at the Bronze level according to Version 5.0. This independent evaluation across five sustainability performance categories gives owners and specifiers confidence in choosing a product designed to have a positive impact on people and the environment.

SINGLE NEEDLE

FIBER SPECIFICATIONS

Fiber A	**Fibrillated Long Slit**
Denier	8,000
Thickness	120 Microns
Color	Field Green
Fiber B	**Fibrillated Long Slit**
Denier	5,500
Thickness	120 Microns
Color	Field Green

SYSTEM SPECIFICATIONS

Pile Height	1.75-2.25 inches
Face Weight	42-50 oz/yd^2
Primary Backing	Non-Woven/Woven/Woven
Primary Backing Weight	8 oz/yd^2
Secondary Backing	Polyurethane
Secondary Backing Weight	22-24 oz/yd^2
Total Weight (without infill)	72-82 oz/yd^2
Tufting Gauge	1/2 inch
Tuft Bind	>12 lbs force
Permeability	>40 inches/hour
Infill Options	Per Specifications
G Max Warranty	Per Specifications

The information provided above represents the standard characteristics for the named product. If required this product can be manufactured to meet alternative specification requirements within our manufacturing tolerances. The above referenced data and supporting reports apply only to the sample tested and are not necessarily indicative of the qualities of apparently identical or similar products.

PRODUCT CERTIFICATIONS

Sprinturf materials undergo independent testing and certification by Firefly Sports Testing for PFAS, PAHs, hazardous metals and material consistency. Scan to learn more about our Material Testing & Compliance Certification Program.

Firefly Sports Testing CERTIFIED TO EN 71-3

Firefly Sports Testing CERTIFIED TO EPA METHOD 1633

Firefly Sports Testing CERTIFIED TO ASTM F3496

WHY SPRINTURF

SPRINTURF
A PLAYCORE Company

Superior performance that stands the test of time

- Exceptional durability and longevity through time-tested polyethylene resin technology, including octene-based (C8) formulations proven to withstand demanding use and retain fiber resilience over years of play.
- Zero fiber failures since 2010
- More than 4,000 field installations nationwide

Sole source accountability

- One connected process from pellet to play
- 8-year manufacturer's warranty
- Independent third-party warranty insurance

Clean materials. Uncompromising proof.

- Third-party-certified materials rigorously tested for PFAS, PAHs, and heavy metals
- Leading the industry in material transparency to provide our customers with defensible documentation and confidence

PROPELLING COMMUNITIES FORWARD

Industry-Leading Cost Per Playable Hour

- Fiber extrusion, tufting, and coating in Sprinturf-owned U.S. facilities.
- Superior cost control due to manufacturer-direct model.
- ISO 9001-certified processes for consistent, repeatable quality.

Opening Day Delivered

- 99.7% on-time delivery record.
- Consistent, reliable installation with 90% of fields installed by Sprinturf's manufacturer-trained, in-house crews.
- Dedicated pre-construction team keeps your project on time and on point.

Experience the Sprinturf Difference

- Visit a nearby Sprinturf field to see the quality and performance firsthand.
- Tour our manufacturing facilities for an inside look at our superior process.
- View documented product certifications and laboratory reports.
